

“My daughter always came home bubbling with enthusiasm and talking excitedly about all the things they built or discussed, and it was clear that she connected with Big Learning much more deeply than with any other activity we had tried with her. – Parent

Our third-grader is rarely excited about the world of academics but each time after he finished a session at Big Learning he was extremely excited about what he learned, the processes he used and so proud of the finished product. This enthusiasm about learning has carried over into his classroom.”
-Parent

KIDS! Make Toys that Really WORK! Big Learning Presents Toymaking

**This Fall, after school at Carderock
Springs E.S.**

Fridays 3:30-4:30, Sept 16- Nov 18
(No class Oct. 21, Nov. 11)

Grades 2-4. \$95.00 for 8 sessions.

You'll make **toys that fly, spin, and zoom.**

- Use wood, wire, and foam to make toys that are colorful and strong.
- Use scientific ideas to design fun toys.
- Use art techniques to make your toys beautiful and creative.
- Take your toys home to keep.

Register online at www.biglearning.org

**Big Learning is Real World, Hands-on Learning that
Supports School and Life Success**
